

spiratest

Combines test management, requirements traceability, and bug-tracking

- ✓ Integrated requirements, test case and defect management with full traceability
- ✓ Powerful executive dashboards, customizable charts and reports that provide real-time status
- ✓ Central repository for manual, exploratory, and automated tests with global scheduling

Let us take care of all the infrastructure in our secure cloud, or download and install on your own servers.

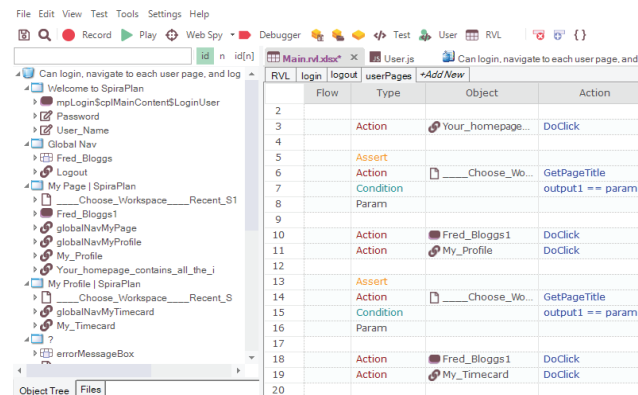

Over 45 Integrations, including:

Selenium	Test Complete	Jira
Bamboo	Jenkins	Zendesk
Jama	Version One	ServiceNow
Every major unit test framework		

rapise

The ultimate scriptless test automation platform for web, mobile, and desktop

- ✓ ML powered automated test recording that creates test scripts from user actions, with validation built-in
- ✓ Keyword and data-driven testing using Excel spreadsheets and databases
- ✓ Robust integrations and easy extensibility using Javascript and third-party libraries

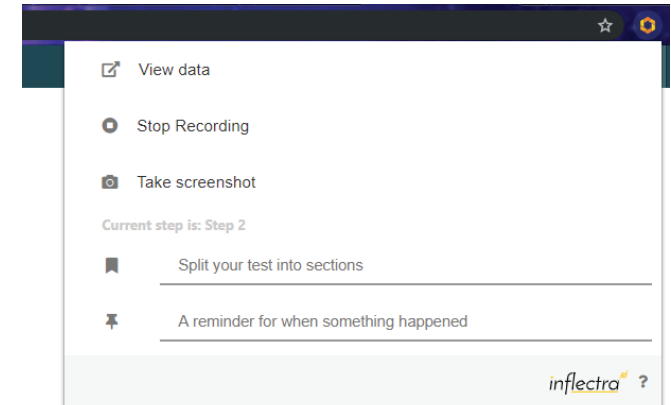

Rapise can test and integrate with all your technologies, including:

Web apps	REST/SOAP	iOS
Android	Java	Windows
Salesforce	MS Dynamics	Appium
JUnit	VSUnit	Neoload
SAP Fiori	RPA	

spiracapture

Free exploratory testing Chrome extension to help testers explore and log issues fast

- ✓ Intelligently records and organises your whole testing session
- ✓ Easily find the steps to reproduce an issue and log incidents straight into SpiraTest/Team/Plan
- ✓ Built-in preview, only data you choose to send to Spira ever leaves your machine

What you get with Inflectra

Trusted worldwide by 5,000+ companies, 80,000+ users, 100+ countries

Legendary customer support with unlimited phone and email.

As many named users as you want - we charge based on how many people are using our products at the same time.

Everything else? Unlimited. Unlimited products, sprints, tests, API calls, you name it.
